PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer with hands-on experience building AI-integrated desktop, mobile, and web applications. Skilled in Python, Flutter/Dart, and REST API integration, with an active open-source contribution record across multiple hackathon and community programs. Seeking software engineering internship opportunities to apply strong problem-solving and cross-platform development skills.

EDUCATION

B.Tech in Computer Science Engineering

2024 – 2028

Manipal University Jaipur, Jaipur, India

Class 12 (Senior Secondary)

2021 – 2023

Radiant International School, Patna, India

TECHNICAL PROJECTS

Tappy | Remote Phone-to-Laptop Controller [GitHub](#)

- Built a cross-platform system enabling a phone to function as a wireless mouse and keyboard for a laptop over Wi-Fi, using a Flutter app and a Python server.
- Implemented automatic device discovery via UDP broadcast, allowing seamless phone-to-laptop connection without manual IP entry.
- Designed a real-time trackpad, click, and scroll interface communicating with a Flask REST API to control laptop input.
- Technologies:** Flutter, Dart, Python, Flask, PyAutoGUI, UDP Sockets

Slate Studio | Cross-Platform File Toolkit [GitHub](#)

- Developed a Flutter application serving as an all-in-one toolkit for image conversion, image compression, PDF conversion, and PDF compression.
- Delivered support across Android, Windows, and Web from a single codebase using Flutter's multi-platform framework.
- Technologies:** Flutter, Dart, C++, CMake

NSE-bot | Discord F&O OI Bot [GitHub](#)

- Built a Discord bot that fetches real-time NSE Futures & Options Open Interest data, enabling traders to monitor market activity directly from Discord.
- Integrated live NSE market data APIs with command-based querying to deliver on-demand OI reports to Discord channels.
- Deployed with a Procline-based configuration to ensure persistent uptime on cloud hosting platforms.
- Technologies:** Python, discord.py, NSE APIs, Procline

ZORA | AI Desktop Voice Assistant [GitHub](#)

- Built a floating, always-on-top AI voice assistant in Python that activates on the wake word "Zora" and executes voice commands hands-free.
- Integrated OpenAI GPT-4o to power natural language understanding and context-aware conversational responses.
- Implemented wake-word detection, application launching, and text-typing automation to deliver a fully hands-free desktop experience.
- Technologies:** Python, OpenAI API (GPT-4o), Speech Recognition, PyAutoGUI

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript

Web Technologies: HTML5, CSS3

Frameworks & Tools: Flutter/Dart, Flask, Git, GitHub, VS Code

APIs & AI: OpenAI API (GPT-4o), NSE APIs, Discord API, REST APIs

TECHNICAL EXPERIENCE

Freelance Web Developer

2026

The Splash (Salon) — Freelance

- Designed and built a custom website for The Splash, a salon business, translating their brand identity into a responsive, client-ready site.
- Handled the project end-to-end as a freelancer, from client requirements gathering to deployment.

AI Web Development Intern

Jun 2026

Internship

- Developed AI-powered web applications by integrating modern web technologies with AI solutions.
- Gained hands-on experience in both frontend and backend development within an industry setting.

Open Source Contributor

Jul 2025 – Nov 2025

GirlScript Foundation

- Contributed to GSSoC (GirlScript Summer of Code) by resolving real project issues, gaining first hands-on experience with open-source development and collaborative coding workflows.
